Operitel Corporation Announces \$50,000 Donation to the International Consortium on Anti-Virals

Peterborough ON., May 1, 2008: Operitel Corporation, developer of the award winning LearnFlex™ learning management system, announced today a donation of \$50,000 to the International Consortium on Anti-Virals (ICAV). Located in Peterborough, Ontario, with its headquarters at Trent University, ICAV is a not-for-profit drug development organization dedicated to the discovery, development and delivery of low-cost and accessible anti-viral drugs.

In January of 2007, Dr. Tom Phillips of the Greater Peterborough Innovation Cluster brought together two leading technology companies in the Peterborough region: Operitel Corporation and ICAV. Dr. Phillips understood that Operitel could accomplish the goals of knowledge distribution and management that ICAV requires to connect researchers around the globe. In concurrence with the Innovation Cluster's mandate to support local business and continual growth within the Peterborough community, the connection was made between Operitel and ICAV to create a custom Microsoft Sharepoint® data management system.

“Operitel is very excited to be able to donate the Microsoft Sharepoint® platform and technical support to ICAV for their growing information technology needs. ICAV presented us with their need to establish a globally accessible information management solution for its members. ICAV is a perfect example of an organization that can fully utilize the solutions provided by Operitel and the SharePoint® platform,” said Michael Skinner, President and CEO of Operitel Corporation.

Microsoft's SharePoint® platform provides a powerful, unified portal solution for organizations that need more efficient access to their information and to help their employees collaborate more effectively while delivering relevant content to partners and customers in a targeted and strategic way.

Key features of SharePoint® and key services Operitel will provide to provide ICAV include:

- Tools to increase the efficiency and accuracy of information exchanged in the development of much needed anti-viral treatments.
- A globally accessible document management solution for sharing and reviewing project documents.
- Connections between the people and workspaces of ICAV members internationally.
- Targeted and tailored information to ICAV's users and groups.

“The complex challenge of providing a shared workspace to the more than 200 scientists in 24 countries that form the ICAV global network was presented to Operitel. ICAV needs a reliable and flexible information distribution and collaboration system. With this goal in mind, Operitel provided ICAV with a hosted solution built on the SharePoint® platform. “This information technology partnership will be a valuable asset for our information management requirements. ICAV is excited to be working with Operitel and will look forward to expanding our new portal to partners and network participants from around the world,” said Denis Ferkany, Director Corporate Strategy, ICAV.

About Operitel

Operitel Corporation, producer and distributor of the award winning LearnFlex™ Learning Management System, is an educational technology company that specializes in building adaptive web-based enterprise-level applications.
